**DETAILED ACTION*****Specification***

1. The incorporation of essential material in the specification, page 13, by reference to a foreign application or patent, or to a publication is improper. Applicant is required to amend the disclosure to include the material incorporated by reference. The amendment must be accompanied by an affidavit or declaration executed by the applicant, or a practitioner representing the applicant, stating that the amendatory material consists of the same material incorporated by reference in the referencing application. See *In re Hawkins*, 486 F.2d 569, 179 USPQ 157 (CCPA 1973); *In re Hawkins*, 486 F.2d 579, 179 USPQ 163 (CCPA 1973); and *In re Hawkins*, 486 F.2d 577, 179 USPQ 167 (CCPA 1973).

***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1, 18, 19, 22-24, 26, 27, 29, 30, 32 and 33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bonforte (4,302,878). Bonforte discloses blade 18; main body 20; opening 22; blade sections 24; radial ends juxtaposed between radii 26; edges and cutting edges juxtaposed body 20 and radius 26; an imaginary line bisecting the cutting edge in figure 2 defines two trapezoids, the imaginary bisecting line serves as the top portion of one trapezoid

Art Unit: 3724

and the bottom portion of the other trapezoid; inner edge juxtaposed body 20; outer edge juxtaposed radius 26; blunt edge running between the sharp cutting edges in figure 2 past the opening 22; radially outer end is adjacent to radii 26; changing contour occurs where the outer end transitions to the outer edge via radius 26; trapezoidal tapering manner in figure 2 between radius 26 and opening 22. Bonforte does not disclose a blade made of metal in the description of the embodiment in figure 2, however, Bonforte does teach a body made of metal in the background section in column 1, lines 10-11. It would have been obvious to provide a body made of metal in Bonforte as taught by Bonforte in order to use cheap, ready-available materials for manufacturing.

*Allowable Subject Matter*

4. Claims 6, 25, 28 and 31 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
